

**Important:** As of 19/09/24 all versions of MariaDB, MySQL 5.7 and 8.1 will no longer be supported. Consider upgrading to MySQL 8.0 or 8.4.

# GM Commands

GM commands can be entered mainly in 2 ways. Either by typing it directly into the world console window. In the world console window the leading dot (.) is not mandantory, but you can use it. The other way is using the gm command ingame in the chat console of the wow client. There, all commands must start with a leading dot, f.ex.: .gm on

Note: Some commands are working only by selecting a player or a creature. These commands can not be used in the world console.

Some commands require higher security level. To grant this you need to use the `account set gmlevel` command through the console.

Command	Security	Syntax	Description
account addon	1	<code>.account addon #addon</code>	Set expansion addon level allowed. Addon values: 0 - normal, 1 - tbc, 2 - wotlk.
account 2fa setup	0	<code>.account 2fa setup</code>	Setup 2fa authentication. Use .account 2fa setup 1 to receive token. Apply token to authenticator app (case sensitive). Use the pin from app with .account 2fa setup PIN to confirm setup.
account 2fa remove	0	<code>.account 2fa remove</code>	Remove 2fa authentication.
account create	4	<code>.account create \$account \$password</code>	Create account and set password to it.
account delete	4	<code>.account delete \$account</code>	Delete account with all characters.
account lock country	0	<code>.account lock country [on/off]</code>	Allow login from account only from current used Country or remove this requirement.
account lock	0	<code>.account lock [on/off]</code>	Allow login from account only from current used IP or remove this requirement.
account onlinelist	4	<code>.account onlinelist</code>	Show list of online accounts.
account password	0	<code>.account password \$old_password \$new_password \$new_passwor d</code>	Change your account password.
account set addon	2	<code>.account set addon [\$account] #addon</code>	Set user (possible targeted) expansion addon level allowed. Addon values: 0 - normal, 1 - tbc, 2 - wotlk.
